Description and Logical Flow

- ***Description***
  - The products page displays all the products listed by sellers. For each product, it shows the name, rating, category, and a summary. Users can filter products by category, price, and popularity. They can also search for products using keywords in the product descriptions.

- ***Logical Flow***
  - The products page has access to all the products in the database and can retrieve their name, image, description, category, and rating.
  - When users filter by category, price, or popularity, only the matching products are displayed.
  - Clicking on a product redirects the user to the product's detailed page, which shows more information about the product.
